

## Educators Demand Action

In recent years, the gun lobby has aggressively pushed legislation that would force primary schools, secondary schools, colleges and universities to allow guns on their campuses. **School security** is of paramount importance, but safety is weakened, not enhanced, when teachers, school staff, college students, and/or members of the general public bring guns into our schools and campuses.

If you agree America’s educators and students should not have to worry about the presence of guns in schools, and pledge to stand up for the safety of American educational spaces—**now is the time to act!** We expect more guns on campus/guns in schools bills to be introduced across the country in 2017. That’s why we’re asking educators to join us now. When, and if, these bills arise in the states, we want to help you speak out and show that American educators overwhelmingly oppose guns in schools.
